shopping center

breon 1999

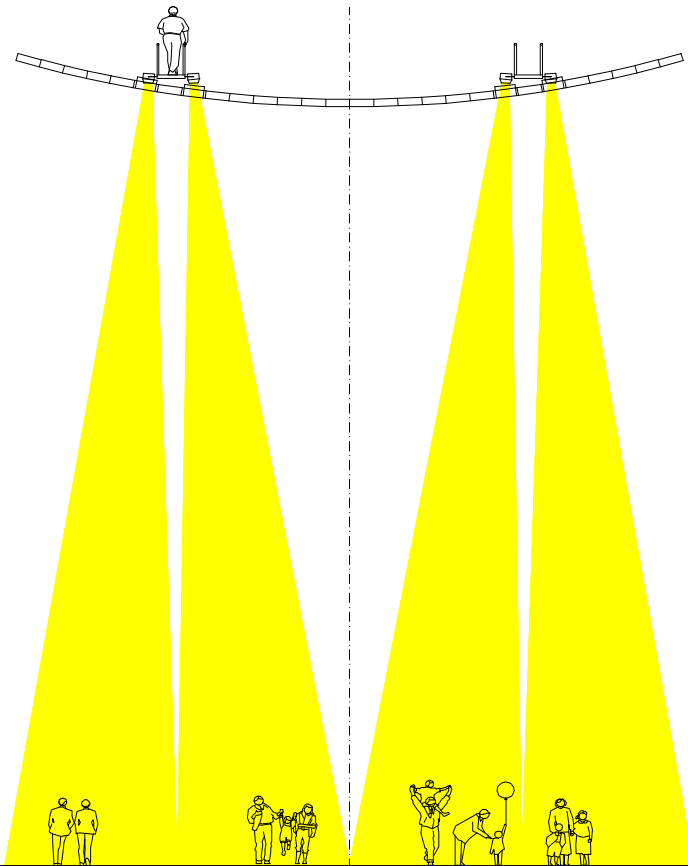

project: renovation of one of the major shopping malls in singapore, located along orchard road, the central commercial district. a metal ceiling looks like it is being curved through gravity. at 6 storeys above ground level, 56 spot lights are incorporated in this metal womb.

kreon 1999

specifications: 56 HIT 1500W lamps with an angle of 4° provide ambient lighting on the area 25 meter below. this narrow beam enables recessed and hidden positioning of the spot lights, thus providing no glare to the visitors. all services and techniques are incorporated in the suspended ceiling.
